

Tema Adventure

Technical specification

J4051

1- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it offers excellent resistance to weathering and vandalism.

2- **The platforms** are made from a 12.5mm thick, textured, non-slip compact material (HPL). Further reinforcement is provided by galvanised steel supports.

3- **The steps and the inclined elements** are made from a 12.5mm thick, textured, non-slip compact material (HPL).

4- **The sliding surface** is made of stainless steel 2mm thick, shaped, bent and rolled in one piece.

5- **The climbing holds** are made of polypropylene. They are non-toxic, non-flammable and shock and UV resistant.

6- **The abacus spheres** are made of soft, rotary moulded polyvinyl chloride.

7- **The fixings** are made of stainless steel and protected by anti-vandalism polyamide caps.
